

NKS PRESET LIBRARY : SYLENTH

For Komplete Kontrol / Maschine

freelancesoundlabs.com

19 December 2022

Intro

Welcome to the Sylenth NKS Library for the Native Instruments Komplete Kontrol / Maschine software and hardware.

This NKS Library pack contains 5000+ factory and extra presets for Sylenth1 that can be loaded and browsed directly using the Komplete Kontrol and Maschine software/hardware. All presets have been converted to NKS files that contain the preset information, tagging information and mapped controls. Additionally a database file and plug-in artwork is also included to create entries in your User Library.

Compatibility / Requirements

- Komplete Kontrol v2.0+ / Maschine 2.6+
- Supports Komplete Keyboards (all versions)
- Supports Maschine Hardware (all versions)
- Supports VST2 / VST3
- Supports PC / Mac
- [Sylenth1](#) v2.21 or later Required

This is NKS compatibility files only. This will not work without the actual VST/Library being installed

Download

A free version is available that contains a handful of presets for you to test with.

The full version is available for purchase with an immediate download.

Installation

First ensure you have the VST plug-in installed and available to the software. Confirm if you need the VST2 or VST3 version.

In Complete Kontrol It should already appear in your File > Plug-ins menu.

In Maschine open the plug-in browser and check the VST is listed:

If the plug-in does not appear in these locations you need to check the VST is available at the location set within Preferences. Perform a rescan if any changes are made.

Once the plug-in is confirmed installed and working with the software, copy the preset and artwork (if included) to the following locations:

Database Files: Contains the browser images and database details for the Complete browser. Place the "image" and "dist_database" folders in the following location (or copy the sub folders inside these folders if they exist):

Windows: C:\Users\Public\Public Documents\NI Resources

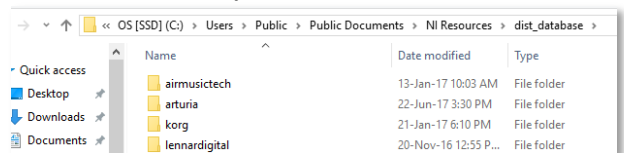

MAC: /Users/Shared/NI Resources

Image Folder Example:

Database Folder Example:

All User library database and image files will be held in these folders with a unique folder for each vendor/plugin.

NOTE: Be sure to copy the sub folders into the above locations. You want to add the folders with the existing folders. Mac users should be cautious NOT to “Replace” the entire image or database folder with the included ones. You must copy these folders INTO the image and database folders (Merge)

Preset Files: Contains the preset files that need to be added to your user library. Copy this folder to your user library location. By default the user library is located at:

WIN: C:\Users\[USER]\Documents\Native Instruments\User Content

MAC: Users/[USER]/Documents/Native Instruments/User Content

You can confirm this location within the Komplete\Maschine software Preferences > Library > User Library

NOTE: If you already have a previous version of this NKS library you should delete it and replace with the latest version.

After the files have been copied, launch the Komplete Kontrol in STANDALONE mode to do a library update. If the software is not set to auto-scan on start-up, open Preferences > Library then select Rescan

If everything has worked correctly you should now see the plug-in listed in the browser with an assigned category, artwork for the plug-in and the installed presets will be listed in the browser. A new installed library will create a new Bank entry.

Be sure you are looking in the **User Library**  as User created NKS files do not appear in the factory library.

Problems?

If artwork is not displayed or the categories are not created there may be differences in how your VST plug-in is labelled compared to the database files. For all issues please visit the [Forum Thread](#)

The Preset Browser

Presets are accessed by selecting the User library icon at the top of the browser .

Select a library using the bank feature.

You can browse using any tags or reconfigure/rename tags using the tag editor in Komplete/Maschine.

Selecting a preset from the list will open the plug-in and automatically load the preset. You can then use the mapped controls to start tweaking the sounds.

VSTs are logically mapped with master controls such as volume, pan and filters on the first pages then envelopes, effects and some sound design controls on further pages.

Controller Mappings

Controls have been mapped as logically as possible and cover most of the available controls. Every control has been hand labelled with easy to read tags. Pages are listed in order of importance.

It is possible to generate a new control map for all presets so if you believe you have a much better template or you would like to have your own custom mappings, just contact me to discuss this.

FAQ?

Keep up to date with the latest NKS Library releases, updates and improvements

[Subscribe to our Monthly newsletter](#)

Can these presets be added to the Factory Library?

Yes they can. There are a couple of files that need to be created which are specific to your install locations. There are instructions on how to do this [Here](#)

Which Native Instruments Keyboard/Maschine hardware does this work with?

The NKS libraries will work with ANY Complete Keyboard or Maschine Hardware

I'm not hearing any sound previews?

Check your preview volume is up in the Factory library and check you have a .preview folder with sound files in it. Some presets may have missing files so please report any issues with presets stating the preset name and the instrument/library.

I've noticed some issues

If you find any issues with incorrectly saved presets, sound preview issues, incorrect tagging etc please let us know the details and we will try and fix this up as quickly as possible.

I'm having some installation\usability issues

If you are having issues with installing and using the preset library, check out the [Forum Thread](#) to ask other users who may have some solutions. Also, check above for installation videos. Feel free to contact us if you still have issues.

Images are not displaying for the libraries!

This is normally down to the installation of the database/image folders not being correct. In some cases the plugin name could be different. If you cannot resolve your issue feel free to contact us (links below).

Can I get other VSTs or preset library's created as NKS?

I can only create presets for instruments I own or have a copy of. I am always on the lookout for new VST instruments at good prices so may do more down the track. If you are able to offer me a legal copy of a VST or can transfer me the library I can have a look if it is possible to make NKS compatible. If you are a plugin developere it may also be possible to add NKS compatibility for official factory inclusion. Feel free to contact me.

No guarentee is offered that the included library will work in all cases. A test version can be downloaded before purchase as refunds are not offered for incompatibility, change of mind or any other reason. Because of the nature of the product refunds are not possible but assistance is available before purchase to best ensure things wll work for you.

Users are not authorised to share, distribute or host the files in this download with anyone else without the consent of Freelance SoundLabs. A lot of work goes into managing this project, hosting the files and writing documentation and I am also an active forum member helping out users. Income from these libraries helps to develop further libraries and support users. We actively check these libraries are not being distributed and each users download contains a hidden fingerprint which will result in your account being closed if files linked to your account are found available for download elsewhere so please do not distribute with others.

NKS Library: Lennar Digital Sylenth
Freelance Soundlabs
Changelog

v2.6.0 (7 July 2022)

- Unified/Updated tagging over all NKS libraries and set library base version to 2.6.0

v2.5.3 (11 Oct 19)

- Updated preset control map with small fix for a few labels and new Arp Shuffle control
- Added additional 140 presets to Bank 6 after latest Sylenth update

v2.5.2 (19 April 2019)

- Re-rendered sound previews to address glitch issue at end of file and also reduce size of library.
- Cleaned up and improved some tagging across libraries.
- Some library paths have changed to group some plugins by developer in the user folder.

v2.5.1 (18 Apr 19)

- Deleted duplicate preview sounds folder

v2.5.0 (11-Mar-19)

- Updated NKS tagging to NKS 1.5

v2.2.1 (10 Dec 2018)

- Added Nucleus bank

v2.2.0 (21 Apr 2018)

- Added more tagging to files
- Added version number (2.2.0) to NKS description for files
- Fixed missing sound preset files for bank Xtra > Hardcore
- Removed library "Xtra > Foster" as it was a duplicate set of presets from Factory 2

v2.1.1 (9 December 2017)

- Added display thumbs to Maschine/Komplete MK3 browser when plugin loaded
- Updated Bass sound files to be higher pitched
- Updated and cleaned some tagging
- Updated documentation

v2.1 (24 October 2017)

- Added sound preview files for all presets
- Removed some more [Library] tags that were missed
- Removed duplicate library presets
- Updated plugin artwork
- Updated documentation

V2.0 (23 October 2017)

- Added Library Bank selection to each library
- Removed [Library] tag place holder
- Updated splash artwork with Maschine/Komplete Kontrol & NKS branding
- Updated documentation
- Updated download packages
