2 August 2024

Intro

Welcome to the Korg Collection 5 NKS Library for the Native Instruments Komplete Kontrol / Maschine software and hardware.

This library collection contains browsable NKS libraries for the factory content of all instruments in the Korg Collection 5 bundle. Each instrument has fully tagged presets with detailed controller maps, library artwork and sound previews.

Includes NKS libraries for the following instruments:

- ARP 2600
- Arp Odyssey
- Electribe-R
- EP-1
- Kaoss Pad (Effect)
- M1
- microKorg
- miniKorg
- MonoPoly
- MS-20
- Polysix
- Prophecy
- Triton
- Triton Extreme
- VOX Super Continental
- Wavestation
- LegacyCell *(currently only VST2 supported)*

Compatibility / Requirements

- Supports Komplete Kontrol 2.9+ / Maschine 2.17+
- Supports Maschine Controller (all versions)
- Supports Komplete Kontrol Keyboards (all versions)
- **Supports VST3**
- Supports PC / MAC
- **15GB of HDD space needed for library files!**
- Korg Collection 5 VST Required

You need to have the VST3 version of the plugins installed
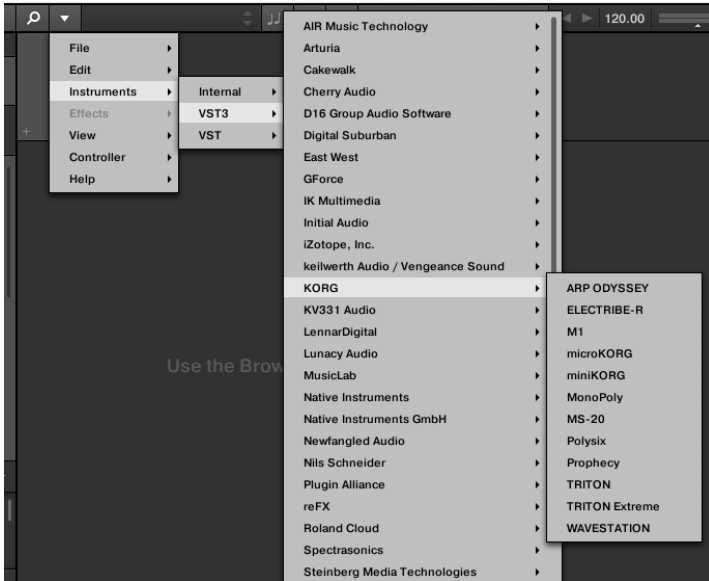

Download

A free version is available that contains a handful of presets for you to test with.

The full version is available for purchase with an immediate download.

Installation

First ensure you have the VST plug-in installed and available to the software.

In Komplete Kontrol It should already appear in your File > Plug-ins VST3 menu.

In Maschine open the plug-in browser and check the VST is listed:

If the plugin does not appear in the plugin list above, check your Preferences > Plug-ins locations tab and ensure the VST location where your VSTs are installed is added into this. For VST3, this should be added by default but chefck this. For VST2 plugins this may be a custom location (especially on Windows)

Once the plug-in is confirmed installed and working with the software, copy the preset and artwork (if included) to the following locations:

Database Files: Contains the browser images and database details for the Komplete browser. Place the "image" and "dist_database" folders in the following location (being sure to copy ALL contained folders as they are in the included:

Windows: C:\Users\Public\Public Documents\NI Resources
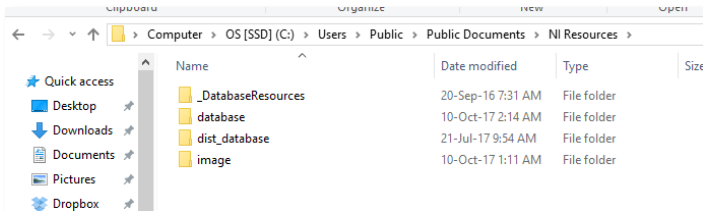

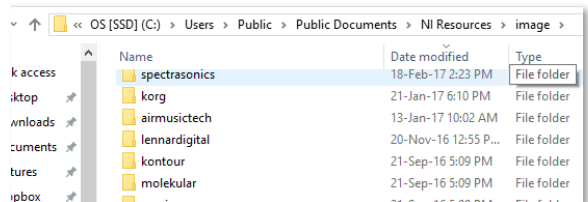

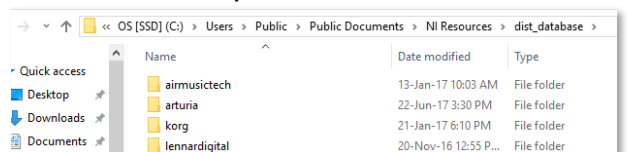

MAC: /Users/Shared/NI Resources

Image Folder Example:

Database Folder Example:

All User library database and image files will be held in these folders with a unique folder for each vendor/plug-in.
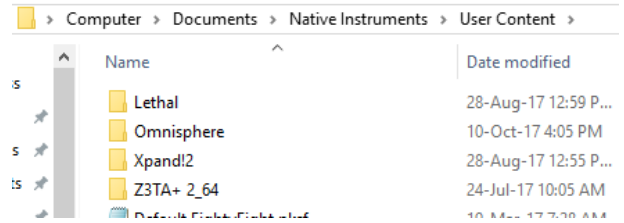

NOTE: Be sure to <u>copy</u> ALL folders into the above locations. You want to add the folders with the existing folders. <u>Mac users</u> should be cautious NOT to "Replace" the entire image or database folder with the included ones. You must copy these folders INTO the image and database folders <mark>(Merge)</mark>

Preset Files: Contains the preset files that need to be added to your user library. Copy this folder to your user library location. By default the user library is located at:
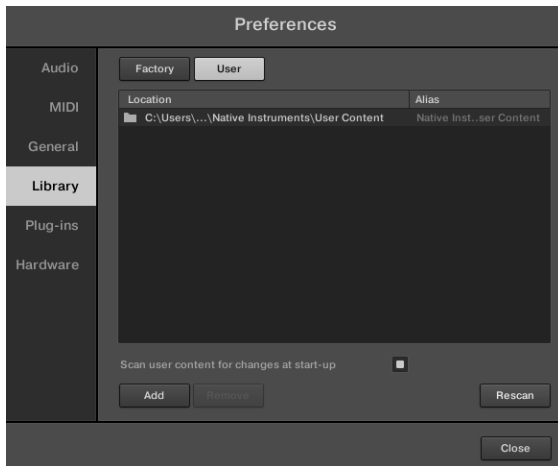

WIN: C:\Users\[USER]\Documents\Native Instruments\User Content

*MAC: Users/[USER]/Documents/Native Instruments/User Content*

You can confirm this location within the Komplete\Maschine software Preferences > Library > User Library

NOTE: If you already have a previous version of this NKS library you should delete it and replace with the latest version.

After the files have been copied, launch the Komplete Kontrol in <u>STANDALONE</u> mode to do a library update. If the software is not set to auto-scan on start-up, open Preferences > Library then select Rescan

If everything has worked correctly you should now see the plug-in listed in the browser with an assigned category, artwork for the plug-in and the installed presets will be listed in the browser. A new installed library will create a new Bank entry.

Be sure you are looking in the **User Library** as User created NKS files do not appear in the factory library.

Problems?
If artwork is not displayed or the categories are not created there may be differences in how your VST plug-in is labelled compared to the database files. For all issues please visit the Forum Thread

The Preset Browser

Presets are accessed by selecting the *User library* icon at the top of the browser [image]. It is also possible to integrate with your Factory Library

Banks have been created for expansions and "cards" within each instrument to allow browsing in the same way as the original instruments.

Selecting a preset from the list will open the plug-in and automatically load the preset. You can then use the mapped controls to start tweaking the sounds.

microKorg contains both Instrument presets and FX presets so you can select an FX slot in Komplete Kontrol or Maschine and choose to load the Vocoder presets as an effect.
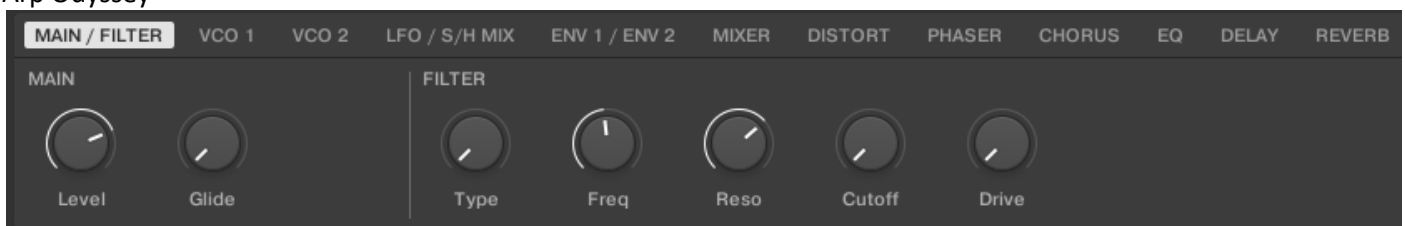

Note About Installation Requirement: The unzipped NKS files require approx *15GB of HDD space*. This is because of the very inefficient way the Korg Triton/Extreme instrument stores presets when saved out of the VST.
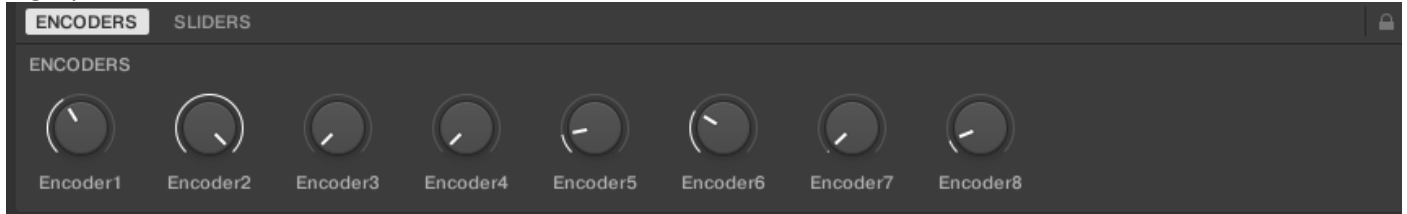

Controller Mappings

All available controls in each instrument have been carefully mapped and labelled into organised pages for convenient control of each synth. There are some synths such as Triton and microKorg that contain different templates for different types of presets (layered/single/vocoder etc)

Below is a snapshot of the control layouts for some synths. Some libraries contain custom per-preset templates to control loaded effects for each preset for plugins that have modular effects.

FAQ?

Keep up to date with the latest NKS Library releases, updates and improvements
Subscribe to our Monthly newsletter
Follow our Facebook Page for all instant updates when they are released

Can these presets be added to the Factory Library?
Yes they can. There are a couple of files that need to be created which are specific to your install locations. There are instructions on how to do this Here

Which Native Instruments Keyboard/Maschine hardware does this work with?
The NKS libraries will work with ALL Komplete Keyboard and Maschine Hardware

I'm not hearing any sound previews?
Check your preview volume is up in the Factory library and check you have a .preview folder with sound files in it. Some presets may have missing files so please report any issues with presets stating the preset name and the instrument/library.

I've noticed some issues
If you find any issues with incorrectly saved presets, sound preview issues, incorrect tagging etc please let us know the details and we will try and fix this up as quickly as possible.

I'm having some installation\usability issues!!!!!!!!!!
If you are having issues with installing and using the preset library, check out the Forum Thread to ask other users who may have some solutions. Also, check above for installation videos. Feel free to contact us if you still have issues.

Images are not displaying for the libraries?
This is normally down to the installation of the database/image folders not being correct. In some cases the plugin name could be different. If you cannot resolve your issue feel free to contact us (links below).

Can I get other VSTs or preset library's created as NKS?
I can only create presets for instruments I own or have a copy of. I am always on the lookout for new VST instruments at good prices so may do more down the track. If you are able to offer me a legal copy of a VST or can transfer me the library I can have a look if it is possible to make NKS compatible. If you are a plugin developere it may also be possible to add NKS compatibility for official factory inclusion. Feel free to contact me.
