

NKS PRESET LIBRARY: ARTURIA ANALOG LAB V

For Complete Kontrol / Maschine

Freelance
SoundLabs

freelancesoundlabs.com

4 February 2023

Intro

Welcome to the Arturia Analog Lab V NKS Library for the Native Instruments Complete Kontrol / Maschine software and hardware. This library covers the Analog Lab V VST instrument which is not part of the NKS compatible instruments available from Arturia.

This library contains all Factory presets along with the freely available libraries for Analog Lab V (8500+ presets). All presets have the macro controls mapped and labelled and have been tagged using details from the Analog Lab library. Sound preview files for browsing and library artwork is also included.

This library will ONLY work with Analog Lab V VST3, it is not compatible with earlier versions of Analog Lab.

Compatibility / Requirements

- Supports Software Complete Kontrol 2.8+ / Maschine 2.16+
- Supports Maschine Studio/MK2/MK3
- Supports All Complete Kontrol Keyboards
- **Supports VST3 64bit**
- Supports PC / Mac
- [Arturia Analog Lab V Required](#)

This is NKS compatibility files only. This will not work without the actual VST/Library being installed

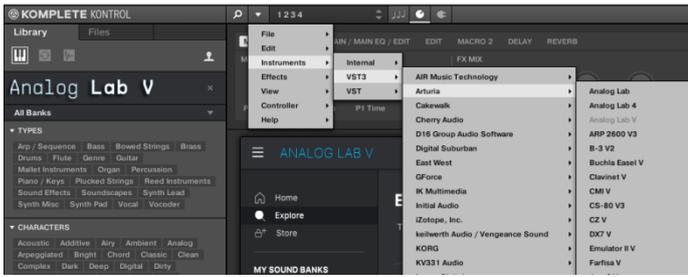

Download

A free version is available that contains a handful of presets for you to test with.

The full version is available for purchase with an immediate download.

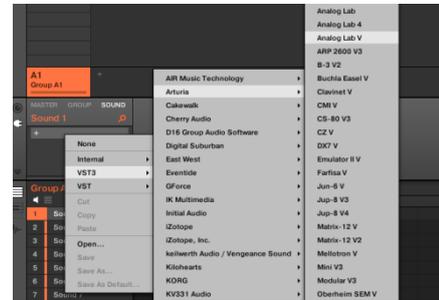

Installation

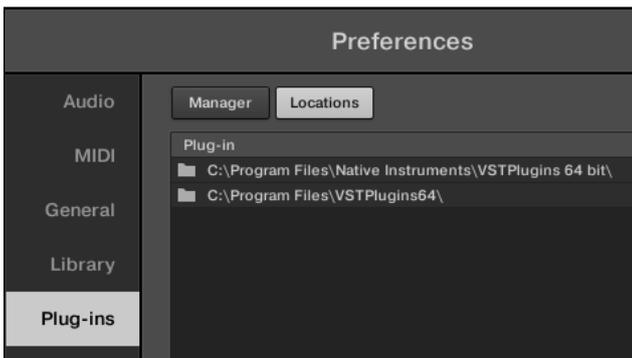

First ensure you have the VST3 plug-in installed and available to the software.

In Komplete Kontrol It should already appear in your File > Plug-ins menu.

In Maschine open the plug-in browser and check the VST is listed:

If the plug-in does not appear in these locations you need to check the VST is available at the location set within Preferences. Perform a rescan if any changes are made.

Once the plug-in is confirmed installed and working with the software, copy the preset and artwork (if included) to the following locations:

Database Files: Contains the browser images and database details for the Komplete browser. Place the "image" and "dist_database" folders in the following location (or copy the sub folders inside these folders if they exist):

Windows: C:\Users\Public\Public Documents\NI Resources

MAC: /Users/Shared/NI Resources

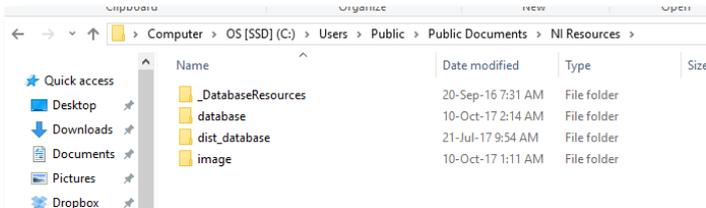

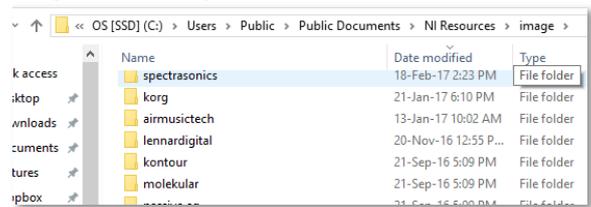

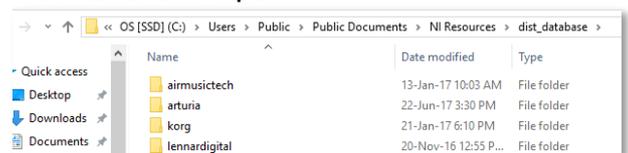

Image Folder Example:

Database Folder Example:

All User library database and image files will be held in these folders with a unique folder for each vendor/plug-in.

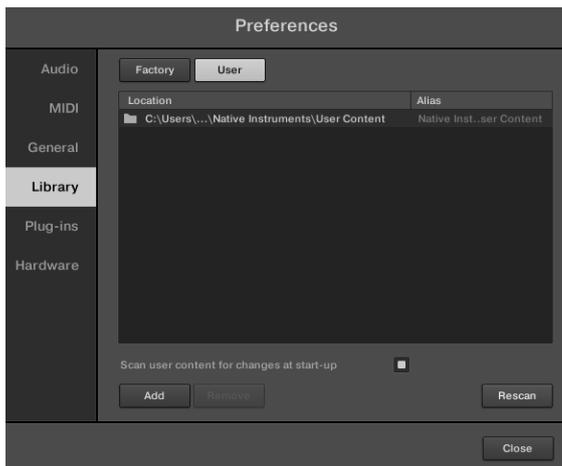

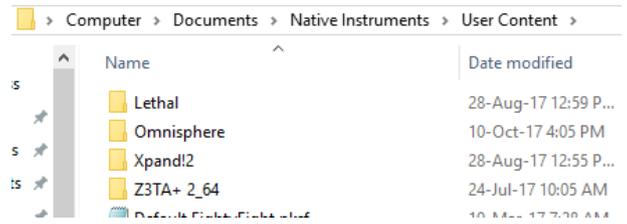

NOTE: Be sure to copy the sub folders into the above locations. You want to add the folders with the existing folders

Preset Files: Contains the preset files that need to be added to your user library. Copy this folder to your user library location. By default the user library is located at:

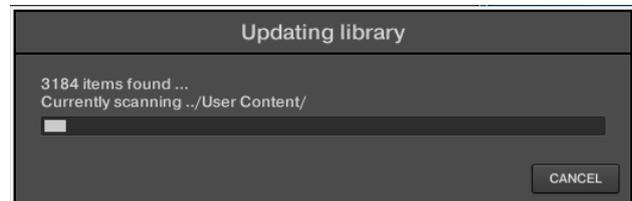

WIN: C:\Users\[USER]\Documents\Native Instruments\User Content

MAC: Users/[USER]/Documents/Native Instruments/User Content

You can confirm this location within the Komplete\Maschine software Preferences > Library > User Library

After the files have been copied, launch the Komplete Kontrol in STANDALONE mode to do a library update. If the software is not set to auto-scan on start-up, open Preferences > Library then select Rescan

If everything has worked correctly you should now see the plug-in listed in the browser with an assigned category, artwork for the plug-in and the installed presets will be listed in the browser. A new installed library will create a new Bank entry. Be sure

you are looking in the **User Library**  as User created NKS files do not appear in the factory library.

If artwork is not displayed or the categories are not created there may be differences in how your VST plug-in is labelled compared to the database files. For all issues please visit the [Forum Thread](#)

Upgrading From Analog Lab 4?

If you are upgrading from Analog Lab 4 please note that Arturia have created a new PluginID for Analog Lab V so any previous projects you have used AL4 will probably still need access to it.

For the NKS browser unless you need to choose between Analog 4/5 you can delete your existing Analog 4 NKS library and replace it with Analog Lab V NKS library to start using the new library.

Upgrading From Previous Analog Lab V Release?

If you are updating your existing AL5 library, you simply need to locate where you copied the Analog Lab V NKS presets, delete this folder and replace with the included library. No need to update/replace the image/database files.

We recommend to delete the existing NKS library and replace instead of overwrite/merge as some files and folders may have changed and you may end up with duplicates otherwise

The Preset Browser

Presets are accessed by selecting the User library icon at the top of the browser .

Select a library using the bank feature. Each instrument has a bank to select

Selecting a preset from the list will open the plug-in and automatically load the preset. You can then use the mapped controls to start tweaking the sounds.

Controller Mappings

There is a controller map for single-part and multi-part presets that covers the main controls, part macro/edit controls and the delay/reverb effects. Note: for single part presets the “global macro” controls have not ben added as they are only needed when multi-parts are used.

Single Part Controller Layout

Multi-Part Controller Layout

FAQ?

Keep up to date with the latest NKS Library releases, updates and improvements

[Subscribe to our Monthly newsletter](#)

Can these presets be added to the Factory Library?

Yes they can. There are a couple of files that need to be created which are specific to your install locations. There are instructions on how to do this [Here](#)

Which Native Instruments Keyboard/Maschine hardware does this work with?

The NKS libraries will work with ANY Complete Keyboard or Maschine Hardware

I'm not hearing any sound previews?

Check your preview volume is up in the Factory library and check you have a .preview folder with sound files in it. Some presets may have missing files so please report any issues with presets stating the preset name and the instrument/library.

I've noticed some issues

If you find any issues with incorrectly saved presets, sound preview issues, incorrect tagging etc please let us know the details and we will try and fix this up as quickly as possible.

I'm having some installation\usability issues

If you are having issues with installing and using the preset library, check out the [Forum Thread](#) to ask other users who may have some solutions. Also, check above for installation videos. Feel free to contact us if you still have issues.

Images are not displaying for the libraries!

This is normally down to the installation of the database/image folders not being correct. In some cases the plugin name could be different. If you cannot resolve your issue feel free to contact us (links below).

Can I get other VSTs or preset library's created as NKS?

I can only create presets for instruments I own or have a copy of. I am always on the lookout for new VST instruments at good prices so may do more down the track. If you are able to offer me a legal copy of a VST or can transfer me the library I can have a look if it is possible to make NKS compatible. If you are a plugin developere it may also be possible to add NKS compatibility for official factory inclusion. Feel free to contact me.
